## DURATION OF YOUR TONER CARTRIDGES

**What does XXXX amount of copies at 5% coverage mean?**

The life of your cartridge is not calculated in **time** but in **numbers**. However, you should also take into consideration a very important factor in your calculations: the percentage of **coverage**. Consequently, to determine the number of copies that you can obtain from a toner cartridge, the majority of manufacturers base their figures on a 5% coverage on a standard 8.5" X 11" (230.2 X 274.9 mm) sheet of paper.

The following test represents an impression at 5% coverage.

### QUIZ

*If my cartridge can print 4000 copies at 5% coverage on a standard 8.5" X 11" (230.2 X 274.9 mm) sheet of paper, how many copies can I hope to produce at a 100% coverage?*

*(answer on page 2)*
